Exercise 9 **Name: Phaveen S**
Reg No: 240701383

Design input forms that validate data (e.g., email, phone number) and display error messages using HTML/CSS, JavaScript (with Validator.js)

AIM:

The aim is to design input forms that validate data, such as email and phone number, and display error messages using HTML/CSS and JavaScript with Validator.js.

PROCEDURE:

Step 1: Setting Up the HTML Form

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<title>Form Validation</title>
</head>

<body>

<div class="container">
   <h2>Contact Form</h2>

   <form id="myForm">
      <label>Email:</label>
      <input type="text" id="email">
      <div id="emailError"></div>

      <label>Phone Number:</label>
      <input type="text" id="phone">
      <div id="phoneError"></div>

      <button type="submit">Submit</button>
```

```
    </form>
</div>

</body>
</html>
```

Step 2: Styling the Form with CSS

```
<style>
    body {
        font-family: Arial;
        background: #f0f2f5;
        display: flex;
        justify-content: center;
        align-items: center;
        height: 100vh;
    }

    .container {
        background: white;
        padding: 25px;
        border-radius: 10px;
        width: 350px;
        box-shadow: 0 4px 10px rgba(0,0,0,0.1);
    }

    h2 {
        text-align: center;
    }

    label {
        display: block;
        margin-top: 10px;
    }

    input {
        width: 100%;
        padding: 10px;
        margin-top: 5px;
        border-radius: 5px;
        border: 1px solid #ccc;
    }
```

```
    input.valid {
        border-color: green;
        background: #f6fff8;
    }

    input.invalid {
        border-color: red;
        background: #fff6f6;
    }

    .error {
        color: red;
        font-size: 13px;
    }

    button {
        width: 100%;
        padding: 10px;
        margin-top: 15px;
        background: green;
        color: white;
        border: none;
        border-radius: 5px;
    }
</style>
```

Step 3: Adding JavaScript for Validation

```
<!-- Validator.js CDN -->
<script
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.9.0/validator.min.js"></script>

<script>
document.getElementById("myForm").addEventListener("submit", function(e) {
    e.preventDefault();

    let email = document.getElementById("email");
    let phone = document.getElementById("phone");

    let emailError = document.getElementById("emailError");
```

```
    let phoneError = document.getElementById("phoneError");

    emailError.textContent = "";
    phoneError.textContent = "";

    email.classList.remove("valid", "invalid");
    phone.classList.remove("valid", "invalid");

    let isValid = true;

    // Email validation
    if (!validator.isEmail(email.value)) {
        email.classList.add("invalid");
        emailError.textContent = "Please enter a valid email address.";
        isValid = false;
    } else {
        email.classList.add("valid");
    }

    // Phone validation (Indian format)
    if (!validator.isMobilePhone(phone.value, 'en-IN')) {
        phone.classList.add("invalid");
        phoneError.textContent = "Please enter a valid phone number.";
        isValid = false;
    } else {
        phone.classList.add("valid");
    }

    if (isValid) {
        alert("Form submitted successfully!");
    }
});
</script>
```

For valid email and phone no.:

Email ramathulasi1610@gmail.com

Phone Number 8438334314

Submit

Error message for invalid email:

Email ramathulasi1610@gmail

Please enter a valid email address.

Phone Number 8438334314

Submit

Error message for invalid phone no.:

Email ramathulasi1610@gmail.com

Phone Number 814jylmdw895

Please enter a valid phone number.

Submit
